Early Childhood Data System (ECDS) Submission - Prekindergarten

The Early Childhood Data System (ECDS) collection is one of the TSDS Core Collections. This guide covers the submission of prekindergarten (PK) data. (Kindergarten data is submitted separately.) The reporting of PK program data for ECDS is mandatory for all public school districts. The reporting of private PK program data is optional.

LEAs are required to submit specific demographic, classroom link, and special program data elements for the 2018-2019 ECDS PK collection. All elements will be submitted in the PEIMS Summer Collection.

The ECDS PK submission is due July 18, 2019.

NOTE: The assessment vendor will provide the ECDS PK assessment data directly to LEAs in TEDS-compliant XML format. LEAs will load the assessment data files into TSDS.

Extract Rules and Edits for 2018-2019

Prerequisites

Prerequisites:

- Verify that all roles and users are correct in TxEIS Security Administration.

Terminology:

- Interchange: A file that contains data in the correct format to be transferred to TEA.
- Complex Type: A grouping of Elements within an Interchange.
- Element: A specific unit of data that must be reported to the TEA.

Hard-coded elements

The following values are built into the program, are the same each time they are extracted, and cannot be changed by the user:

- ORGANIZATION-CATEGORY (E1240) is the classification of the education agency according to
the level of administrative and operational control granted by the state. This is hard coded in the program as “ESC,” “LEA,” or “School” according to the county-district number.

- STUDENT-IDENTIFICATION-SYSTEM (E1090) is the coding scheme used for identification and record-keeping purposes by schools, social services, or other agencies to refer to a student. This is hard coded in the program as “State” and the student’s SSN is used.

I. Before You Extract Data

**IMPORTANT:** This step only applies if have not begun Summer PEIMS. Do not clear summer data if you are still working on summer PEIMS.

- Clear data from the previous year.

Before proceeding, delete last year's data.

*State Reporting > Utilities > Delete/Clear Tables*
Select **Summer Collection**.

Click **Delete**.

You are prompted to confirm that you want to delete the records.
II. Verify TxEIS Business Data

Verify data for each element in the TxEIS Human Resources (HR) application. It is suggested that you run reports first, and then use the maintenance pages in the HR application to update data where needed.

Human Resources

- Human Resources Reports

HR elements can be verified by running the following reports:

*Human Resources > Reports > User Created Reports > HR Report*
Use the HR User Created Report to verify staff demo data.

**Human Resources > Reports > HR Reports > Personnel Reports > HRS1600 - Certification Report**
HRS1600 allows you to view a list of instructors assigned to a particular teacher specialization code that is associated with the PK teacher certification requirement.

- Human Resources > Maintenance > Staff Demo > Demographic Information

Interchange: StaffAssociationExtension

Complex Type: StaffExtension

The following elements from the StaffExtension complex type are included in the ECDS PK submission for the Teacher of Record, Assistant Teacher, and Support Teacher:

- FIRST-NAME Legal - First (E0703) is the employee’s legal first name. Do not use an initial unless an initial is the legal first name.

- LAST-NAME Legal - Last (E0705) is the employee’s legal last name.

Human Resources > Tables > Credential > Teaching Specialization

**III. Verify TxEIS Student Data**

Verify data for each element in the TxEIS Student applications. **It is suggested that you run reports first, and then use the maintenance pages in the Student applications to update data where needed.**

**Grade Reporting**

- **Grade Reporting Reports**

Grade Reporting elements can be verified by running the following reports:
Grade Reporting > Reports > Grade Reporting Reports > Master Schedules > SGR0110 - Master Schedule PEIMS (Grd Rpting)

For PK course-sections, verify the instructor's **Class Role**, **Entry Date**, **Withdraw Date**, as well as **PK Curr**, **High Qual PK**, **Stu Instr**, **PK Sch Type**, **PK Prog Eval Type**, and **Home Room Ind**.

Grade Reporting > Reports > Grade Reporting Reports > Student Schedules > SGR0000 - Student Course Enrollment Listing

**IMPORTANT:** Be sure Home Room Ind is selected for at least one class for all PK students, and that the student was enrolled in this class on the reading assessment date.

- A student can only have one home room selected. (This is a new TEA edit for 2018-2019.)
- If a student was in one homeroom from the beginning of the school year, then moved to another home room on December 1 (for example), but tested in the first home room class, the second class must not have the homeroom indicator set.

The home room indicator identifies the instructor in the ECDS PK system who will be used in the ECDS PK reports. For each PK homeroom Instructor, verify the following on Grade Reporting > Maintenance > Master Schedule > Campus Schedule > Instructor:

**IV. Extract Data**

- Extract summer data.
State Reporting > Extracts > Summer

CAUTION! Each time you extract data, you overwrite the data in the frozen files (i.e., State Reporting maintenance pages), including any data that was manually entered.

Ending School Year: 2019
Display only) The submission year as entered in the Submission Year field on State Reporting > Options is displayed.
For the 2018-2019 ECDS PK submission, the field should display 2019.
For the ECDS PK submission, select the following:

- **Attendance**
  Select to extract attendance data.
  
  **Semester to Extract:** For the ECDS PK submission, the field should be set to **All**.

- **Course Extracts**
  
  **NOTE:** You can select to run the Classroom Link and Course Completions extracts individually; however, the program expects the Classroom Link extract to be run first. If you select to extract Course Completion data but do not select to extract Classroom Link data, the program verifies that Classroom Link records exist for the current school year. If they do not exist, a message is displayed and no data is extracted.

- **Classroom Link**
  
  The extract does the following:
  
  - All existing course-section and teacher class assignment records are deleted. Staff demographic records are not deleted in order to accommodate districts that manually update staff demographic data or merge staff demographic data from a TEA file.
  
  - Course-section data is selected for all course-sections in the master schedule that have student enrollment, and a record is created for each course-section.
  
  - Teacher class assignment records are created if the non campus-based instruction code for the course-section is 00 or blank. If a course-section has multiple teachers (multiple meeting times), a record is created for each teacher.
  
  - The begin and end dates on the teacher class assignment record captures the classroom assignments for classroom teachers records are extracted from the meeting time records for each course-section in Grade Reporting.
  
  If the end date is blank, the latest semester end date for the campus is used. If there are multiple tracks, the end date for the track that ends on the latest date is used. The date will be adjusted as needed when the course completion extract is run. Example: At campus 001, track 1 ends on 5/29/20, and track 4 ends on 6/5/20. The end date for all records will be 6/5/20.
  
  - If a district is using the Business system, staff demographic data is extracted from HR. The staff type code is set to 1 (school district employee) for all instructors extracted from HR. If an instructor is on the master schedule but not in HR, a partial staff demographic record is created (staff ID and name only), and the staff type code is set to 3 (contracted professional staff).
  
  - If a district is not using the Business system, partial staff demographic records (staff ID and name only) are created for all instructors in the master schedule with staff type code 1 (school district employee).
  
  - If a duplicate record is found when attempting to add a staff demographic record, the first and last names on the two records with the same staff ID are compared.
  
  If the names match and the staff demographic data is being extracted from HR, the record in TxEIS State Reporting is updated.
  
  If the names do not match, a warning message is listed on the error report.

- **Flexible Attendance**
  
  Select to extract the following data: **InterchangeStudentExtension** and **InterchangeStudentAttendanceExtension**.
Email (Optional) Type your email address if you wish to receive email notification when the extract is complete.

☐ Click Run.

A message is displayed indicating that the extract is in progress.

- You can either wait for an email notification that the extract is complete, or view the status of the extract on Extracts > Extracts Status.
- If errors are encountered, the Error button is displayed. Click Errors to view the list of errors.

• Monitor the status of extracts.

Once you run the extract utility, you can either wait for an email notification that the extract(s) are complete, or view the status of the extract(s) on Extracts > Extracts Status.

Email Notification

If you typed your email address when you ran the extract, an email message is delivered to your Inbox once the extract is completed. You will receive a separate message for each summer extract.

Examples:
Once you receive this email message, you can go to the Extract Status page to view reports.

**Extract Status Page**

State Reporting > Extracts > Extract Status

The Extract Status page allows you to review the status and completion of extracts (i.e., jobs). Once an extract is completed, you can view and print the associated reports.

**Extract Type**

Select the extract type for which you want to check job status or completion.

- The list of jobs for the selected extract type is displayed, sorted by date in descending order.
The data can be re-sorted. A white triangle is displayed in the heading row next to the column by which the grid is currently sorted. If the column is sorted in ascending order, the triangle points up. If the column is sorted in descending order, the triangle points down.

- To re-sort data in the grid, click the underlined column heading. It will sort in ascending order.
- Click it again to sort in descending order.

The following vary by **Extract Type**:

**Error/Extract Summary**

Various error reports may be displayed if errors are encountered. Click **Print Report**. Review and correct all errors. Student records are not extracted if the following conditions exist:

- Blank or invalid SSN, including 000000000
- Blank Texas Unique Student ID
- Invalid student record status
- Duplicate SSNs (The first student encountered with the SSN is extracted; all others with the same SSN are not extracted.)

Verify the counts for each record type, and determine the reason for each bypassed student.

**If students are bypassed:**

1. Correct data in the student files.
2. Run the [Delete/Clear Tables utility](#) to delete or clear previous data for the desired tables.
3. Re-extract the data.
4. Verify the data.
5. Repeat until no students are bypassed.

- Review the Extract Summary report for each extract and correct any errors.
- Correct data and rerun the extract until there are no fatal errors.
V. After you Extract

- Verify and update frozen organization data.

The following Organization data is always maintained from the maintenance pages; there is no extract, unless you used the Import External File utility.

**State Reporting > Maintenance > Organization > County District**

![Interchange: EducationOrganization Complex Type: LocalEducationAgencyExtension]

The following elements from the `LocalEducationAgencyExtension` complex type are included in the ECDS KG submission:

- **DISTRICT-ID District ID** (E0212) is the identification number registered with the TEA of the district reporting the student.

- **DISTRICT-NAME District Name** (E0213) is the name of the district as it will appear on your submission data, up to 34 characters.

- **FAMILY-ENGAGEMENT-PLAN-LINK Family Engagement Plan Link** (E1583) is the website address used by the LEA to provide its Family Engagement Plan. This only applies if you have received the High Quality Prekindergarten grant.

**State Reporting > Maintenance > Organization > Campus ID**
The following elements from the *SchoolExtension* complex type are included in the ECDS PK submission:

- **CAMPUS-ID** *Campus* (E0266) is the unique campus ID registered with the TEA.
- **CAMPUS-NAMES** *Campus Name* (E0267) is the name of the campus as it will appear on your submission data.

2. Correct frozen data.

You may find extracted data containing incomplete or inaccurate information. Use the TxEIS State Reporting summer maintenance pages to update and correct the data saved in the district database (i.e., frozen data).

**NOTE:** Data on these pages is updated every time data is extracted, including data that is manually entered.

**IMPORTANT:** The LEP Code (LEP-INDICATOR-CODE LEP Cd (E0790)) cannot be updated from the State Reporting Summer Student Demo Maintenance page. It must be correct on *Registration* > *Maintenance* > *Student Enrollment* > *Bil/ESL* so that it is correct in the Student interchange.
Correct `SectionExtension` data as needed for the ECDS PK submission.

## State Reporting > Reports > Summer > Student Report Group > Course Completion

**State Reporting > Utilities > Create State Reporting Interchanges**

**NOTE:** If you have already completed summer PEIMS and created interchanges, it is not necessary to create the interchanges again for the ECDS PK submission unless you have made changes to the data.
Select the following individual interchanges for the ECDS PK submission:

- **Education Organization Interchange**
- **Student Interchange**
- **Student Enrollment Interchange**
- **Staff Association Interchange**
- **Student Program Interchange**
- **Master Schedule Interchange**
- **Student Attendance Interchange**

**Selected Students**
The field is enabled if you selected all interchanges or a student-related interchange. Type or click to select the students for whom you want to create an interchange. Separate multiple students (Texas unique student IDs) with a comma (e.g., 6895409515,1628657282,2986961713). Leave blank to select all students.

**Selected Staff**
The field is enabled if you selected all interchanges or a staff-related interchange. Type or click to select the employees for whom you want to create an interchange. Separate multiple employees (Texas unique staff IDs) with a comma (e.g., 4732877094,2568052155). Leave blank to select all staff.

Click **Run**.

When the process is complete, you are prompted to save a .zip file containing the individual files for the completed interchanges.

The default name of the zipped folder is *District_YYYY-MM-DD.HH-MM-SS.TSDS.zip*, where:

- **District** is the six-digit county-district number
- **YYYY-MM-DD** is the date when the folder was created
- **HH-MM-SS** is the hour, minute, and second when the folder was created

Example: 015102-2019-07-01.15-30-22.TSDS.zip

The default name for the individual files is *District_Campus_Collection_TimeStamp_Interchange.xml*, where:

- **District** is the six-digit county-district number
- **Campus** is the three-digit campus ID
- **Collection** is the nine-character collection (ending school year & submission)
- **TimeStamp** is the 12-digit date-time-stamp when the interchange was created (YYYYMMDDHHMM)
- **Interchange** is the name of the interchange created.

Example:
If errors are encountered:

1. Correct the data in TxEIS.
2. Run the Delete/Clear Tables utility to delete or clear previous data for the desired tables.
3. Re-extract the data.
